Technical Skills

Backend & Languages

C#
.NET / ASP.NET
Node.js
Entity Framework

Frontend

HTML5
CSS / SCSS
JavaScript
TypeScript
Angular
React

Databases & Tools

SQL
Git
Github
VS Code
Jetbrains Suite
Postman

Software Development student focused on .NET, with a background in pedagogy and creative work, and extensive experience working closely with people. I thrive in environments where creativity, structure, and collaboration intersect, contributing to solutions that keep individual needs in focus.

Projekt

ELLA / Fullstack in team [[GITHUB](#) | [LIVELÄNK](#)]

Tech stack: HTML5, CSS3, JavaScript, SQLite, Node.js

Role-based room booking and management system featuring authentication, authorization, and admin workflows. Developed in a team with a focus on .NET backend development, database management, and collaboration.

Ink&Render / Solo Project [[GITHUB](#) | [LIVELÄNK](#)]

Tech stack: HTML5, CSS3, JavaScript, Node.js

Markdown editor demonstrating parsing, AST handling, and real-time rendering from Markdown to HTML.

Drive clone / Fullstack in team [[GITHUB](#) | [LIVELÄNK](#)]

Tech stack: Angular, node.js, SCSS

Proof of concept supporting secure file upload via drag-and-drop, download, preview, and permanent file deletion.
